Irsyad Abdul

Fullstack Engineer (Node.js & Golang)

abdulirsyad15@gmail.com | (+62)88809151020 | Jakarta, Indonesia

Fullstack Engineer with 5+ years of experience building scalable web applications, backend services, and distributed systems across banking, enterprise, and SaaS environments. Specialized in Node.js, TypeScript, Golang, and React/Next.js, with proven expertise in microservices architecture, asynchronous processing, caching strategies, API design, and database optimization. Delivered high-reliability solutions in regulated banking environments where performance and uptime are non-negotiable.

WORK EXPERIENCES

PT. Krom Bank Indonesia (June 2025 – Present)

Fullstack Engineer - Internal Tools Team

- Cut average API response time by ~75% by implementing Redis caching across banking platform APIs, significantly reducing database query load during peak operational hours.
- Improved system isolation and processing reliability by migrating long-running workflows into a dedicated BullMQ consumer service, now handling 2M+ data records per weekday.
- Delivered secure, scalable backend services using TypeScript and Express.js, deployed on AWS EKS with S3 for storage and Scalyr for observability.
- Improved usability across multiple operational departments by building modern, responsive internal UIs with Next.js and Mantine UI.
- Turned operational requirements from product owners and business stakeholders into production-ready features within a cloud-native AWS environment.

Tech Stacks: Node JS, Typescript, Express JS, PostgreSQL, Redis, React JS, Next JS, Mantine UI, BullMQ, Websocket, AWS EKS, AWS S3, Scalyr

PT. Bank Rakyat Indonesia (June 2024 – May 2025)

Fullstack Developer - Corporate Core Platform (CCP) Team

- Shipped 3 production microservices using Fastify and NestJS, sustaining up to 100 RPS with stable performance under real transaction load.
- Improved cross-service integration reliability across corporate banking workflows by building event-driven asynchronous pipelines with RabbitMQ and Redis that decoupled service dependencies.
- Significantly reduced processing time compared to prior synchronous implementations by developing and maintaining Golang services for high-throughput background data processing.
- Reduced manual intervention across operational processes by automating recurring business tasks with scheduled jobs and background workers.
- Accelerated feature delivery across the corporate banking platform by building reusable frontend components with Next.js and Material UI.
- Improved overall system performance through code optimization, query tuning, and architectural enhancements.

Tech Stacks: Node JS, Javascript, Typescript, Fastify JS, Golang, Gin, Next JS, Nest JS, MySQL, RabbitMQ, Redis, Material UI

PT. Optima Media Teknologi (August 2022 – May 2024)

Backend Developer

- Delivered scalable, maintainable RESTful and GraphQL APIs powering multiple enterprise and web-based applications, with an emphasis on clean code.

- Improved application responsiveness across high-traffic endpoints by resolving critical API and database performance bottlenecks through query optimization and Redis caching.
- Became the primary technical reference for data modeling decisions by designing and leading database schema design (ERD) for new applications.
- Improved code quality and development consistency by conducting code reviews for a 2-person backend team and establishing engineering standards.
- Delivered integrated business solutions across diverse client environments by collaborating with frontend engineers, GIS specialists, and project stakeholders

Tech Stacks: Node JS, TypeScript, Nest JS, Laravel, REST API, GraphQL, PostgreSQL, MySQL

Andaf Corporation (August 2020 – August 2022)
Web Developer

- Delivered client-facing websites and digital platforms for the marketing and e-commerce industries using Laravel and MySQL.
- Built custom CMS solutions with integrated third-party payment gateways and analytics APIs, and delivered SEO and performance optimizations per client requirements.
- Owned end-to-end feature delivery from planning through deployment, working directly with clients to gather requirements and propose technical solutions.

Tech Stacks: Laravel, MySQL, Wordpress.

EDUCATIONS

UIN Syarif Hidayatullah Jakarta (2016 – 2022)
Bachelor of Informatics Engineering (Computer Science)
GPA: 3.52/4.00

SKILLS

Languages: Node JS JavaScript, TypeScript, Golang, PHP, Python
Backend: Express JS, Nest JS, Fastify, Laravel, Gin
Frontend: React JS, Next JS, Mantine UI, Material UI
Databases: PostgreSQL, MySQL, MongoDB, Redis
Other: REST API, GraphQL, WebSocket, Microservices, Docker, AWS ECS, AWS EKS, CI/CD, RabbitMQ, Git

AWARDS AND CERTIFICATIONS

- 1 of Top 30 Titans in Telkomsel Tech Titans League Series 1 – Software Development 2020 (certificate)
- Getting Started with DevOps on AWS (certificate)
- Pemrograman Golang: Pemula sampai Mahir (certificate)
